

WeldCube

Air

Full Oversight

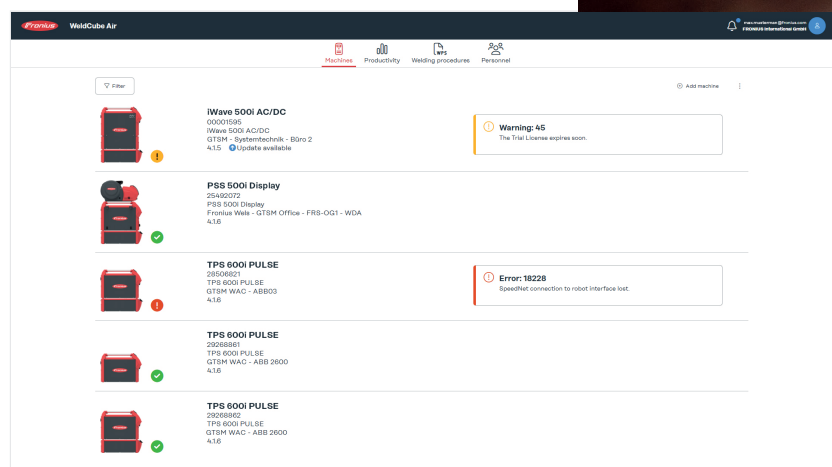

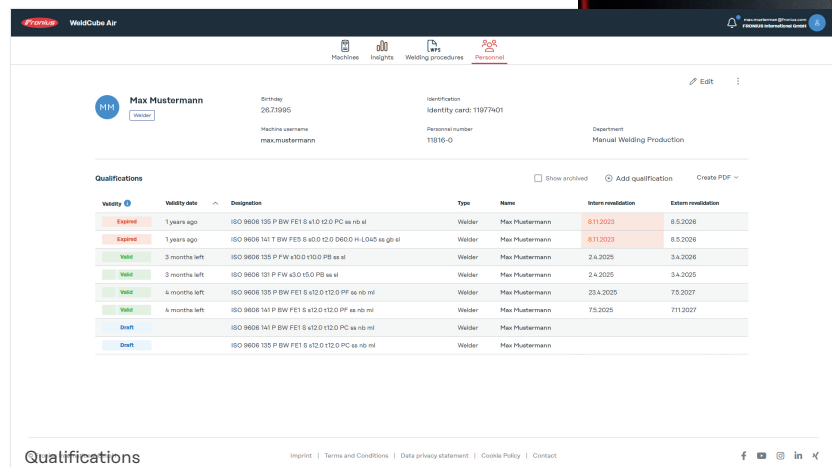

WeldCube Air is a user-friendly, cloud-based software solution to support companies of all sizes in digitalizing their welding operations.

WPS & qualifications

WeldCube Air supports welding supervisors with managing welding procedure specifications and certificates in compliance with the applicable standards, and assists with the traceability and validation of this documentation.

- Central oversight: Create and manage welding procedure specifications and certificates in one place
- Search function: Find the welding procedure specifications you need and match them with accredited welding specialists
- Reminder function: Automatic reminders notify you in advance when welding certificates are due for revalidation
- Parameter sets feature: Link job to welding procedure specifications and roll out to all your welding machines

Welding equipment management

Digital management for effective welding

WeldCube Air makes management of your welding equipment intuitive and efficient. Managing your welding machines digitally not only saves time, but also enables you to organize and keep clear oversight of your system data, ensuring your machine fleet is ready for use the moment you need it.

- Back-up and recovery: The option to reset the configuration accelerates troubleshooting, effectively reducing downtime.
- Optimize maintenance: The welding system shows the current process, errors, and warnings in real time to ensure welding runs efficiently and smoothly.
- Digital resource: Important information, such as operating instructions and maintenance documents, can be accessed in WeldCube Air at the touch of a button.

Productivity in view

Achieve optimal results with decisions based on data. Our software solution gives you valuable insights into your company's optimization potential.

- Boost productivity: Improve your production processes through arc switch-on time analyses.
- Optimize your consumption: Our software solution helps you identify potential savings and effectively lower your costs.
- Complete transparency: Analyze your data—whether absolute, relative, an average, or by welding system or shift—for time periods of up to a month.

Anytime, anywhere

WeldCube Air is a secure, cloud-based platform allowing you to conveniently connect to and visualize welding data. There are no complicated procedures involved in installing the application. It's ready to use right away, and facilitates the efficient management of your welding operations. Anytime and anywhere—whether on your PC, in the office, or on the go with your mobile device.

Certified security: The security of your data was at the forefront of our minds when it came to selecting a cloud service provider. Certification to ISO 27001 and compliance with the most demanding European data protection rules were non-negotiable. All data collected is always held subject to the highest security standards.

We're ahead of the curve: WeldCube Air is not only compatible with TPS/i and iWave, but also with future generations of our welding machines. So you know you're always up to date, including when new or updated products come along, while retaining full oversight of your welding operations.
